65% UMAXX® + Mg, Fe & Micros

Water soluble fertilizer for greens, tees and fairways.

Product Features

- Balanced nitrogen and potassium formulation to promote healthy, stress resistant turf.
- 65% of the nitrogen is from UMAXX® stabilized nitrogen. UMAXX® contains two inhibitors that reduce nitrogen loss to ammonia volatilization and nitrate leaching.
- High rate of potassium.
- Contains chelated iron and manganese for better micronutrients availability.

Turf Benefits

- According to research, at least 30
 percent of the nitrogen from urea can
 be lost to the atmosphere through
 volatilization within days of application.
- Urease inhibitor in combination with the nitrification inhibitor in UMAXX® urea significantly increases nitrogen absorption by turfgrass to provide uniform growth, deep root mass and consistent colour intensity over 12 to 16 weeks.
- UMAXX® performs consistently regardless of soil temperature or weather.
- Provides a high rate of potassium for improved drought tolerance, greater disease resistance and improved wear tolerance.
- Iron provides deep green colour without excessive top growth.
- Magnesium and sulphur help promote good turf colour and vigour.
- Contains sufficient sulphur to aid in correcting deficiencies while maintaining adequate soil levels.

Directions For Use

- Read the entire label before use.
- Apply only as directed during the growing season.
- Nutrite recommends using this product with an application rate of 4 to 8 liters of water per 100 m².
- Do not leave product in the spray tank for prolonged periods without agitation; mix and apply product the same day.
- Watering after application will accelerate initial green-up.
- Nutrite encourages responsible use of our products. Help do your part in protecting our rivers and lakes by following label directives and cleaning driveways and walkways after application. Do not apply near water storm drains or drainage ditches, if heavy rain is expected or frozen ground.
