

AERATION RECOVERY

Your golfers will thank you!

Treat your aerated turf with a complete foliar program, including natural plant extracts and active L-amino acids. Give your turf the necessary advantage for rapid recovery.

This program results in more rapid closure of core cultivation holes, improved turf recovery and higher quality turf. With the use of this program, nitrogen applications for the purpose of aeration recovery can be considerably reduced or quite possibly eliminated.

Apply this program 3 days prior to aeration and again 7 days after aeration.

Foliar-Pak® 14-2-4 This high-performance macro-nutrient fertilizer supplements plant metabolic activity and provides nutrition for color and proper tissue development while amino acids increase the production of anti-stress compounds.

Rate:
3 to 6 oz
per 1000 sq ft

Foliar-Pak® Foundation Forty A highly concentrated blend of specific amino acids to drive protein and enzyme production for better stress tolerance, improved plant energy, and more rapid turf recovery.

Rate:
1 oz
per 1000 sq ft

Foliar-Pak® Armament® Bio Advanced plant and soil supplement that supports plant and soil life. This unique technology will improve antioxidant activity for recovery of leaf and root tissue after disruption from core cultivation. It supports root growth and microbial activity during this critical period. Living biology including mycorrhizae will improve damaged root systems to increase nutrient and water uptake.

Rate:
3 oz
per 1000 sq ft

Foliar-Pak® Talon Improves lateral growth of stolons, rhizomes and enhances foliar recovery. Talon improves cell division, nutrient use, photosynthetic properties and helps turf maintain healthy green color.

Rate:
1 to 2 oz
per 1000 sq ft
