

OSC ULTIMATE™

Bentgrass Blend

Fast Establishment

Fine Texture

Excellent Quality

L93-XD – New from Jacklin, L-93 XD is setting the standard for leaf texture and a uniform canopy. Quick to germinate, L-93 XD is excellent for renovations or interseeding. Superb tolerance to dollar spot and heat stress means fewer fungicide applications. L-93 XD is also a good choice for superintendents who like to manage on the dry side.

T-1 – Known for its versatility, T-1 adapts to all mowing heights, up to ½ inch, and its aggressive lateral growth allows it to recover quickly from divots but still produce minimal thatch. T-1 is a proven performer at all levels of maintenance and under broad climate conditions - from Canada to Alabama.

Key features

- Excellent tolerance to Dollar Spot and other diseases
- Fast germination and establishment
- Aggressive recovery on tees and high traffic areas
- Uniform canopy at all mowing heights up to 1/2 inch

T1 Fairway in the Transition Zone

Two Amazing Companies - One Great Partnership!

Where else can you find two centuries of combined expertise in the seed industry? Ontario Seed Company, with over 125 years of growing service, and Jacklin – Barenbrug, with a combined 200 years of seed research and production, team together to bring you Ultimate Elite Bentgrass Blend. This powerhouse blend of L-93 XD and T-1 offers enhanced disease tolerance and championship performance to your tees, greens and fairways.
