

General Description

TS Pure Green is a unique blend of green pigment and Advanced Pigment Technology engineered to improve turf quality appearance and provide exceptionally long-lasting color during the spring and summer months. Pure Green can be used on all Turfgrass varieties and when used in conjunction with proper maintenance practices, will produce enhanced turf quality and provide relief from extreme environmental stress.

Recommended Rates

Green 16 - 32 ounces per acre depending on desired color
Tees and Fairways 16 - 24 ounces per acre depending on desired color
Rough and Bunkers 10 - 16 ounces per acre depending on desired color
Spring Greenup 32 - 48 ounces per acre depending on desired color

Turf Screen / TS Pure Green Tank Mix for Greens:

Turf Screen 1 - 2 ounces per M depending on spraying interval
TS Pure Green 8 - 16 ounces per acre depending on desired color and spray interval

Directions for use

For best results begin initial applications as soon as snow melts or first available opportunity. Weekly to bi-weekly applications throughout the spring months will provide enhanced turf quality and aesthetics. Pure Green is safe to use as a spray pattern indicator any time of the year and can be effectively tank mixed with Turf Screen Enhanced Solar Protection for complete plant protection.

When you get serious about protecting your turf, contact the Turf Max Team!

Turf Max LLC proudly introduces the most effective, versatile and affordable dark green pigment available for turf professionals. Formulated with Advanced Pigment Technology, TS Pure Green is engineered with the precise blend of ingredients to provide improved turf quality appearance and is specifically designed for spring time and summer usage. Pure Green's versatility is unmatched in the industry; utilize it for a quick spring green up, to increase fungicide application efficacy, to reduce the effects of phytotoxicity burn, to hide a hydraulic leak or simply as an inexpensive spray pattern indicator. However Pure Green is put to use, you can be sure it was developed with your bottom line and high expectations in mind.

Pure Green Benefits:

- Improved turf quality and color
- Improved environmental stress tolerance
- Improved pesticide efficacy
- Long-lasting Advanced Pigment Technology
- First in-class effectiveness
- First in-class versatility
- First in-class affordability
- Increased visibility as a spray pattern indicator
